

HP/HT Wells drilling Intervention & Extended

This course includes ideas and concepts that have been accumulated, and observed during my twelve years of association with oil business.

This course builds a firm foundation in the principles and practices of HP/HT drilling, it includes the answer of all questions for the participants.

This course clears the ideas and the benefits of using HP/HT drilling, emphasizing the importance of applying this technique, selecting the drilling fluid to avoid reservoir damage, casing design, cementing techniques and well control.

How, why and what is HP/HT drilling, eliminating the problems, discussing the challenges for drilling safe operations.

This course gears with each level working in the oil industry
